

### **Suggested Problems to Use in Preparing for the Midterm**

The following problems in Kennedy provide practice for most of the types of questions that will be asked on much of the midterm, in terms of both subject matter and degree of difficulty. The answers to all of these questions are in the book.

C6  
G2, G4, G6, G8, G12, G14  
I2  
J2, J4  
K2  
N2, N8  
O4  
X2, X4  
Z2, Z4, Z6  
AA2  
TT2

In addition, review your problem sets and the relevant sections of both Wooldridge and Kennedy (various pages as assigned so far in the course). You may also want to do some of the unassigned end-of-chapter problems in Wooldridge (the non-computer ones) for additional practice. You can also look at the midterms (and answer sheets) from the last two times I taught the course, which are available on the course website.
