

3rd paper

3-5 pages, double-spaced, 12-pt font, 1-inch margins, due by 6 pm on 10/17/08
Please title your paper.
Papers are graded on writing quality as well as on content.

If you currently have or have had a paid job (or a regular volunteer position):

Describe the gender dynamics and composition of the place where you work or worked. Describe the degree of occupational sex segregation, and the pay and promotional gender patterns, if any. If there are gender-related patterns, state your thinking as to why these patterns exist. If there are no patterns, explain why there are none.

If you have not had a job for pay or a regular volunteer position:

Which explanations of society-wide sex segregation in Chapter 6 do you find least plausible? Which do you find most plausible? Can you think of particular areas of the U.S. workscene which provide evidence for each explanation?
