INVESTIGATION.

EACH BATHROOM SCOPE VARIES BASED ON SPECIFIC

REQUIREMENTS.

Please consult the detailed project scope for each bathroom, including the specific requirements and materials needed. The following list provides a general overview:

- Plumbing
- Electrical
- Lighting
- Ventilation
- Heat and Cool Systems

These components vary depending on the bathroom's location, size, and intended use. Ensure all materials comply with local building codes and standards.

1. **Plumbing**
   - Water supply lines
   - Drainage systems
   - Waste disposal

2. **Electrical**
   - Electrical wiring
   - Lighting fixtures
   - GFCI outlets

3. **Lighting**
   - Ambient lighting
   - Task lighting
   - Emergency lighting

4. **Ventilation**
   - Exhaust fans
   - Ventilation ducts
   - Condensation control

5. **Heat and Cool Systems**
   - Heating elements
   - Cooling systems
   - Thermostats

Consult with a professional to finalize the scope and ensure all aspects are covered.
