**Analyst Description:** Beige/White, Homogeneous, Non-Fibrous, Bulk Material

**Asbestos Types:**
- Other Material: Non-fibrous 100 %

## Reporting Notes:

1. TEM confirmation of PLM results recommended

*NAD/NSD = no asbestos detected; NA = not analyzed; NA/PS = not analyzed/positive stop; PLM Bulk Asbestos Analysis by EPA 600/M4-82-020 per 40 CFR 763 (NVLAP Lab Code 200546-0); ELAP PLM Method 198.1 for NY friable samples, which includes the identification and quantitation of vermiculite or 198.6 for NOB samples or EPA 400 pt ct by EPA 600/M4-82-020 (NY ELAP Lab ID11480); Note: PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials. NAD or Trace results by PLM are inconclusive, TEM is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos-containing in NY State (also see EPA Advisory for floor tile, FR 59,148,38970,8/1/94) National Institute of Standards and Technology Accreditation requirements mandate that this report must not be reproduced except in full without the approval of the lab. This PLM report relates ONLY to the items tested. AIHA Lab # 102843, RI Cert#AAL-094, CT Cert#PH-0188, Mass Cert#AA000054.

**Comments (inaccessible areas, etc.):**

---

**Notes**

**Damage Factors:**
- Physical (vig drmg-dmg-no drmg)
- Water (extensive-moderate-slight-none)
- Deterioration (heavy-moderate-light-none)
- Friability (yes-no; hard-mod-soft surface)

**Disturbance Factors:**
- Proximity (<1ft. 1-6ft. >6ft)
- Accessibility (within-reach-barely-reachable-not reachable)
- Vibration (gym-music rm-auditorium-mechanical rm-elevator-other)
- Barriers (perm airtight-enclosed-encapsulated)
- Ventilation (yes-no; if yes, type)
- Air Conduits (air plenum - air shaft - elevator shaft - duct)
- Air movement (high-moderate-low)
- Texture (rough-splintered-moderate-smooth)

**Relinquished By/Date:** Ricky Howard 2/18/14
